How do you track the results of your company?

With BXBsoft Business Intelligence tools you can increase the productivity of all departments and the result of your business.

It is a low cost of ownership software and provides rapid return on investment, enabling small and medium organizations also have access to highly efficient management instruments.

Useful in any kind of organization and industry, the BI software can be integrated into business application systems and assists in the analysis and management of information, both of a project or department as well as in a whole company.

See what the customers say:

"It is easier to compare data in different ways. It helps us very much when negotiating with suppliers, provide better sales, inventory and procurement planning."

> Gabriel Seifert, director & owner of Seifert Ótica e Joalheria

"The benefits brought by BXBsoft BI tools have given us meaningful agility to analyze our financial situation in real time, and evaluate our historical data in a brief and reliable way."

> Edson Althoff CFO of Cinq Technologies

"It's straight to the point, we do not need special training, do not pay for more than we need. From installation to the use, it took less than a week."

> Nilo Ferreira Junior CEO of Embrapol

Special conditions for business software application developers and integrators looking for a more dynamic data analysis and decision support tool.
